DURABLE. FLEXIBLE. TOUGHER THAN THE REST.

THE BEST MATERIAL ON THE MARKET FOR COATING ROOFS.

COMPARED TO OTHER ROOFING
PRODUCTS, EXPANDOTHANE:

- > Costs less
- > Adheres to all substrates
- > Provides greater durability
- > Seamless membrane, no fastener failures
- > No thermal bridging

Expandothane is completely seamless: no openings, no penetrating fastener holes and no thermal bridging.

Our roof system forms a thermal blanket that controls the expansion and contraction that tears other roofing systems apart.

GET THE EXPANDOTHANE ADVANTAGE

- > Dries in seconds
- > Expands up to seven times its volume
- > FM approved
- > Long-lasting waterproof seal
- > Excellent UV resistance
- > No VOC's
- > Withstands extreme climates
- > 75% faster installation

ABSOLUTE WATER PROTECTION IN A SINGLE APPLICATION

- > Totally seamless system = No risk of failed seam leaks
- > Superior protection in extreme weather conditions, including level 4 hail
- > Withstands ponding water
- > Reduces roof temperatures by 30°F to 50°F and saves energy
- > Adds structural integrity
- > Minimizes impact and disruption during installation on existing buildings
- > Certified by multiple national testing agencies and authorities

OUTPERFORMS:

- > Acrylic
- > Asphalt
- > Urethane
- > And more
